TWO-WAY RADIOS

GP644: The Small Popular Radio

The Small Popular Radio is the simple two-way radio solution for professionals who need to stay in contact. The discreet GP644 can increase productivity, keeping users communicating, whilst allowing them to concentrate on the job at hand. With the Small Popular Radio, communication couldn't be easier.

Operator friendly controls and features include:

- **Signalling**
The fully compliant MPT signalling package includes MPT1343, Regionet 43 and ANN modes of operation. Radios are configurable for up to 2 personalities including Talkgroup Select and Conventional signalling.
- **X-Pand™ Voice Compression and Low Level Expansion**
Crisp, clear and strong audio quality in virtually any noisy environment. Low level expansion allows further improvements in audio quality by reducing noise usually heard during pauses in conversation.
- **Dynamic Regrouping**
Provides over-the-air reconfiguration of group identity.
- **Missed Call Alerts**
The radio can store an incoming caller identity and prompt the user to return the call they receive.
- **Wideband and Programmable Channel Spacing**
Provides flexibility in deployment and stocking.
- **Time-out Timer**
Limits the amount of time a user has to continuously transmit on a channel. This allows for more efficient use of the channel.
